Introduction

The West London Free School aims to provide children with a classical liberal education – one that is centred around the best and most important work in the humanities and the sciences. On leaving school, we hope to have given our pupils an understanding of the world they inhabit, and the ability to participate in the great conversations that have been animating humankind for thousands of years. By giving all our pupils firm foundation, we expect them to pass at least eight academically rigorous GCSEs, giving them the freedom to choose their next steps post-16 from a wide array of opportunities. The West London Free School is also a music specialist school.

Key Stage 3 (Years 7, 8 and 9)

For the first three years at the school, pupils will follow a broad and challenging academic programme that closely follows the National Curriculum in Key Stage 3.

Alongside English, maths and the sciences, every Year 7 pupil will study Latin and ancient history during classics lessons. History lessons focus on the events that have shaped the British Isles and the wider world, delivered in chronological order from the Anglo-Saxons to the 20th century. In geography lessons, pupils focus on the processes that shape the natural world, while divinity teaches the origins and beliefs of the world's main faiths. All pupils will have the opportunity to study a modern language (either French or Spanish), develop their creative flair in art, music and drama, learn to code in computing, and enjoy a healthy competitiveness in games and PE.

Throughout Key Stage 3 pupils are taught in ability-based sets for English, maths and modern languages. Science in set from Year 8. Class sizes are an average of 26 pupils.

Key Stage 4 (Years 10 and 11)

Every pupil in Year 10 and 11 studies the core set of subjects that underpin a classical liberal education: English language and literature, mathematics and science (the last of which is worth either two or three GCSEs, depending on the depth of study). Most pupils will also study at least one ancient or modern foreign language plus history or geography. Further GCSE options include art, classical civilisation, music, divinity and PE.

There is a full guide to the GCSE options offered at the West London Free School in our options brochure *GCSEs – Passport to the Future*.
Pupils will be taught in ability sets for English, mathematics and science. Other subjects will generally be taught in mixed ability groups. Class sizes can vary significantly from subject to subject but they again average 26 pupils per class.

Year 7	**Bio:** Cells **Chem:** Particles and Matter	**Phy:** Forces **Bio:** Reproduction	**Chem:** Elements and the Periodic Table **Phy:** Light and Sound	**Bio:** Ecosystems	**Chem:** Atomic Structure	**Phy:** Space
Year 8	**Phy:** Energy **Bio:** Nutrition and Digestion	**Chem:** Bonding and Structure **Phy:** Electricity and Magnetism	**Bio:** Respiration and Circulation **Chem:** Reactions	**Phy:** Motion and Pressure	**Bio:** Health and Disease	**Chem:** Acids and Alkalis
Year 9	**Bio:** Key Concepts **Chem:** States of Matter Separating and Purifying **Phy:** Waves	**Bio:** Key Concepts **Chem:** Atomic Structure Periodic Table **Phy:** EM Waves	**Bio:** Plant Structures and their functions **Chem:** Groups, Rates of Reaction and Heat Energy Changes	**Phy:** Radioactivity	**Bio:** Health, Disease and the Development of Medicines	**Chem:** Calculations Involving Masses

GCSE Combined Science

Year 10	**Bio:** Cells and Control **Chem:** Bonding **Phy:** Forces and motion	**Bio:** Genetics **Chem:** Acids **Phy:** Energy	**Bio:** Natural Selection & genetic modification **Chem:** Mass Calculations, Electrolytic processes **Phy:** Forces affecting things and doing work	**Bio:** Recap Year 9 - Health, disease and medicines, Plant Structures and functions **Chem:** Metals Reversible Reactions **Phy:** Electricity	**Bio:** Revision **Chem:** Revision **Phy:** Revision	**Bio:** Exams **Chem:** Exams **Phy:** Exams
Year 11	**Bio:** Animal coordination, control and homeostasis **Chem:** Recap year 9 (Groups and Rates of reaction, energy changes) **Phy:** Electromagnetic induction, Energy calculations	**Bio:** Exchange and transport, Ecosystems and material cycles **Chem:** Fuels, Earth and Atmosphere **Phy:** Particles and density	**Bio:** Ecosystems and material cycles **Chem:** Revision **Phy:** Gases, Bending and stretching, Extension and energy transfers	**Bio:** Revision **Chem:** Revision **Phy:** Revision	**Bio:** Revision **Chem:** Revision **Phy:** Revision	

GCSE Separate Science

Year 10	**Bio:** Cells and Control **Chem:** Bonding **Phy:** Forces and motion	**Bio:** Cells and Control, Genetics **Chem:** Acids **Phy:** Energy	**Bio:** Genetics, Natural selection & genetic modification **Chem:** Mass Calculations, Electrolytic processes **Phy:** Forces affecting things and doing work	**Bio:** Natural selection & genetic modification **Chem:** Metals, Transition metals, alloys and electroplating **Phy:** Electricity	**Bio:** Revision **Chem:** Quantitative chemistry, Dynamic equilibrium, Chemical Cells, Revision **Phy:** Revision	**Bio:** Exams **Chem:** Exams **Phy:** Exams
Year 11	**Bio:** Animal coordination, control and homeostasis	**Bio:** Exchange and transport in animals	**Bio:** Ecosystems and material cycles	**Bio:** Revision **Chem:** Choosing materials, Revison	**Bio:** Revision **Chem:** Revision **Phy:** Revision	

	Chem: Recap Yr 9 (Groups, Rates of reaction, Reversible reactions, Dynamic equilibrium, Chemical Cells) **Phy:** Electricity, Electromagnetic Induction	**Chem:** Fuels, Earth and Atmosphere **Phy:** Electromagnetic Induction	**Chem:** Hydrocarbons, Alcohols and carboxylic acids, Polymers **Phy:** Gas temp and pressure, Bending and stretching, Extension and energy transfers, Pressures in fluids, Pressure and upthrust, Braking distance, Rotational forces	**Phy:** Revision		

A-level Biology

Year 12	Basic components of living systems, Biological molecules	Biological molecules, Enzymes	Plasma Membranes, Cell Division	Exchange surfaces and breathing	Transport in animals	End of Year Exams
	Classification and evolution	Biodiversity	Communicable Diseases	Communicable Diseases/ Transport in plants	Transport in plants	End of Year Exams
Year 13	Neuronal communication, Hormonal communication	Homeostasis	Plant responses, Energy of biological processes	Respiration, Population and sustainability	Revision	
	Genetics of living systems, Patterns of inheritance and variation	Manipulating genomes, Cloning and biotechnology	Cloning and biotechnology	Ecosystems, Population and sustainability	Revision	

A-level Chemistry

Year 12	Atoms, Ions and Compounds, Amount of Substance	Acids and redox, Periodicity	Reactivity trends, Enthalpy	Reaction rates and equilibrium	Rates of reaction	End of Year Exams
	Electrons and bonding, Shapes of molecules and intermolecular forces	Basic concepts of organic chemistry, Alkanes	Alkenes, Alcohols	Haloalkanes, Organic synthesis	Spectroscopy	End of Year Exams
Year 13	Equilibrium, Acids, bases and pH, Buffers and neutralisation	Enthalpy and Entropy	Redox and Electrode potentials	Transition elements	Revision	
	Aromatic compounds, Carbonyls and carboxylic acids	Amines, amino acids and polymers	Organic synthesis, Chromatography and spectroscopy	Revision	Revision	

A-level Physics

Year 12	Matter and Radiation, Quarks and Leptons	Quantum	Materials, Young's Modulus, Equilibrium	Mechanics	Mechanics	End of Year Exams

	Electric Current, Resistivity	DC Circuits	Waves, Standing waves, Optics	Optics, Forces and Momentum	Revision	End of Year Exams
Year 13	Gravitational Fields	Electric Fields and Capacitors	Radioactivity	Nuclear Energy and Option Topic	Revision	
	Motion in a circle, Simple Harmonic Motion	Magnetic Fields	EM Induction, Thermal Physics	Gas Laws
